Work Experience

Dec 2015 - Present

Freelance Software Developer
Self-employed
Currently available for part-time contract work. My experience driving projects to completion while following sound engineering practices makes me a great fit for unique business needs, such as:

- A small team looking to offload a self-contained project without the overhead of project management
- Consultation around choosing and implementing new libraries and tools
- Training junior-level developers
- Building an MVP of a new product or feature

May 2012 - Oct 2015

Lead Frontend Engineer
ChatID
One of the first hires and engineers to join ChatID, now a 50+ person Series B-funded startup. Fulfilled multiple roles as needed, including Sales/Implementation/Support Engineer, Project Manager, and Lead Frontend Engineer.
Architected and developed scalable frontend applications deployed across Fortune 50 retailer.com and mobile websites. Collaborated with UI designers and backend engineers to conceive, develop, and launch consumer-facing products.
Led open source development on JavaScript libraries: https://github.com/chatid

Nov 2009 - Jul 2011

Engineering Internships
OMGPOP, Spinback, Durrani Design
Backend Engineering Intern at OMGPOP via hackNY, Summer 2011 Frontend Engineering Intern at Spinback, Summer 2010 Web Development Intern at Durrani Design, Nov 2009 - Jun 2010

Education

2010 - 2012

Liberal Arts / Computer Science
New York University
